

BRANDS YOU KNOW. SERVICE YOU TRUST. CERTIFIED SAFETY.

Make Allied Valve your single source for the highest quality valves and actuators – assembled, tested, installed and maintained with your plant and field safety as our primary concern. Take advantage of our full, one-year parts and service warranty on every new and repaired valve we sell.

Our most popular brands assembled, tested, delivered, actuated and maintained include:

Consolidated

The industry leader for pressure relief valves in ASME Section 1 and Section 8 coded valve applications. Allied Valve stocks a broad range of pressure relief valve solutions, providing reliable protection for plant personnel and equipment.

KUNKLE

A leading manufacturer of quality safety and relief valve products for industrial and commercial applications, including steam, air, liquid (cryogenics) and non-hazardous gases.

Masoneilan®

For over 100 years, customers have relied on Masoneilan control valves products to deliver reliable, customized solutions for oil and gas, power and process generation applications.

Established in 1965, Continental Disc Corporation is a leading manufacturer of rupture disc (bursting disc) devices for all industries. Available in ASME UD Section 8 code stamp.

For over 40 years Groth Corporation has been a global leader in manufacturing tank vents, pressure/vacuum vents, blanket gas regulators and flame arrestors.

For more than 100 years, Welland & Tuxhorn has remained dedicated to manufacturing state-of-the-art special control valves for the power generation industry. Allied Valve is proud to provide factory-trained and authorized service on these high-quality, market-leading W&T products.

A broad range of products for the power, process, oil and gas, and general industry, including Newco gate, globe, check and WKM ball and butterfly valves that meet ASME and API standards.

Perfect for applications using linear, rising stem or rotating stem valves, this gas-driven actuator is capable of producing up to 900ft/lb of torque. With more than a half century of outstanding field performance around the globe, EIM actuators are well suited for both rotary and linear industrial or pipeline valve applications and are ideal for compressor stations.

Paired with rotary and linear valves, Bettis actuators provide automated control in high pressure gas transmission pipeline applications where no pneumatic or electric supply lines are available. Can be supplied with almost any required control system, including remote control and line break systems.

Shafer®

Rotary vane actuators designed to assure reliable performance, even in severe climate and high vibration pipeline applications. Used to automate ball valves or plug valves for emergency shut down, line break protection, mainline isolation and more. Over 100,000 installed since 1955, most are still in operation.

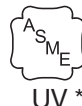

PBV manufactures a wide range of both three- and two-piece API 6D ball valves for use in the gas and oil pipeline industries. They are manufactured to NACE-MRO 175/IOS 15156 specifications for handling H2S service. All come with blow-proof stems and all PBV valves are stamped API 6D-01269. PBV valves can be supplied for buried service.

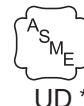

Certified safe by these respected industry experts:

Qualified and approved to assemble Pressure Relief Valve (PRV) for use in Section I applications, including boilers and pressure vessels.

Qualified and approved to assemble Pressure Relief Valves (PRV) for use in Section VIII (UV) applications, Division 1.

Qualified Nonreclosing Pressure Relief Devices to be in accordance with the requirements of the ASME Boiler and Pressure Vessel Code, Section VIII, Division 1.

NB Stamp **

Qualified and approved to assemble, test and stamp Pressure Relief Valves (PRV) for use in Section I and Section VIII (UV) Division 1 applications.

VR Stamp **

Qualified and approved to repair all manufacturers' Pressure Relief Valves (PRV) for Section I, Section IV and Section VIII (UV) Division 1 applications.

*American Society of Mechanical Engineers (ASME) 3-year audit frequency

**National Board of Boiler and Pressure Vessel Inspectors 3-year audit frequency

Certification details available at www.alliedvalve.com

Rely on Allied Valve to help you choose the best product for every application.

Allied Valve Inc.™

www.alliedvalve.com

Rely on Allied Valve for the professional, experienced and industry-certified technicians to get the job done right the first time.

Rest assured, the enormous investments we make each year in professional technician training and re-certifications have important consequences in the safety and efficiency of your operations. Trust Allied Valve with your peace of mind.

Your Total Service Solutions Provider

Safety Valves:

Authorized dealer, EVT testing and repair

Control Valves:

Repair, refurbish, replace trim, and calibrate

Complete Line Valve Repair:

Refurbish all internal parts as needed, assemble and test

Rupture Disc/Conservation Vent/Flame Arresters:

Overpressure and flame protection

Mobile Lab:

Full pressure relief valve testing and VR repairs performed on-site

ValScope Pro:

Complete control valve diagnostics

Oxygen Cleaning:

Shop or field cleaning services for valves in the medical and pharmaceutical industries

Hydrofluoric Acid Services:

Complete on-location or in-house cleaning and decontamination services for line valves, control valves and pressure relief valves

MOV/AOV:

Completely tear down, refurbish, repair to like new condition, and test

Pipeline Actuator Service:

Factory-trained, authorized sales and service for Bettis, Shafer and EIM actuators

Field Machining:

Flange facing, journals, manways, butt end welds

Repair in Shop or Field:

On-site, in-line valve and actuator repair and services

ValvKeep:

Web-based, state-of-the-art, real-time management platform and firewall, manages all your valve data

Training:

On-site technician training from factory-certified representatives

Pipeline Valve Service:

ValvePro trained and certified technicians provide maintenance for pipeline ball, gate and globe valves and solutions for hard to operate valves.

Factory-certified technicians that deliver the service you need, wherever and whenever you need it.

Six nearby locations are available to supply and service your needs.
